

# Understanding Calculus through Linear Maps: A Computational Approach

Robert D. French

# Contents

A Note for Students	iv
Chapter 1. Functional Function Fun	1
1. What is a function?	1
Appendix A. Projects	2
1. Deriving Euler's Method	2
2. Deriving the Improved Euler's Method	2
3. Application of the Methods	2

## A Note for Students

Math is fun and exciting! However, many calculus texts are not. I hope this one will be.

## CHAPTER 1

# Functional Function Fun

### 1. What is a function?

It's a fun function.

## APPENDIX A

### Projects

1. Deriving Euler's Method
2. Deriving the Improved Euler's Method
3. Application of the Methods
  - 3.1. Scalar ODEs.
  - 3.2. Systems of ODEs.
  - 3.3. Method of Lines and PDEs.
